## We ask a hearing before Congress acts

To the Members of Congress:

The Senate has passed a bill to construct an armor manufacturing plant at a cost of \$11,000,000 of the public's money.

The measure is now pending before the House.

The Bethlehem Steel Company has manufactured armor for the United States Government for twenty-nine years.

This Company recognizes its obligation in a matter affecting both national defense and national economy, to place its advice and experience at the disposal of the nation of which it is a citizen.

The Company has a duty to its stockholders to seek to conserve, if possible, an investment of over \$7,000,000 in its armor plant—an investment made at the behest of the Government, and which would be rendered valueless if a Government plant should be built.

This question should, of course, be considered in the broadest way; not with special regard for the Bethlehem Steel Company, or any other private interest, but with supreme regard for adequate national defense and sound public policy.

All we ask is that you give us a chance before you put our armor plant out of existence. There certainly is some point where it would not pay the United States Government to build an armor plate factory. Is it not good public policy to consider carefully, before appropriating the people's money for a Government plant, whether greater economy cannot be realized by utilizing facilities now existing?

In order that all concerned may have the clearest, most concrete and definite information this Company can give on this question, so important both to the nation and to itself, the Bethlehem Steel Company is issuing a series of statements to Congress.

CHAS. M. SCHWAB, Chairman EUGENE G. GRACE, President BETHLEHEM STEEL COMPANY. South Bethlehem, Pa.
